## **Visit of representatives from the Floriculture Department to Kashmir Government Polytechnic College on 11-11-2025.**

In a proactive step towards elevating the aesthetic and environmental standards, representatives from the Floriculture Department visited Kashmir Government Polytechnic College, Srinagar today. The visit focused on evaluating various alternatives for improving the institution's landscaping, following a formal request submitted by the college administration.

During the tour, the representatives, accompanied by Principal Dr. Shafquat Ara, Heads of Departments (HODs), and other senior officers and officials, inspected key areas of the campus, including pathways, green belts, and open spaces. Discussions centered on eco-friendly options such as native plant integration, water-efficient irrigation systems, and vertical greening techniques to combat urban heat and biodiversity loss in the region.

On the occasion, the representatives from the floriculture department emphasized the transformative potential of such projects, stating, "Landscaping is more than beautification—it's an investment in our youth's mental and physical health. By leveraging local flora and modern horticultural practices, we can create resilient campuses that inspire innovation and sustainability.

Principal Dr. Shafquat Ara echoed the sentiment, highlighting the institution's dedication to holistic growth. "This visit marks a significant milestone for Kashmir Government Polytechnic college Srinagar. We are grateful for the Director's expertise and support in reimagining our campus as a model of green excellence. Our students and faculty will benefit immensely from these enhancements, fostering a deeper connection with nature amid our academic pursuits."

The collaborative effort is expected to culminate in a detailed action plan. This aligns with broader governmental goals for environmental stewardship in educational settings across Jammu and Kashmir.
